

CS 213: System Software Lab
Autumn 2023, IIT Dharwad
Lab-7 Exercise

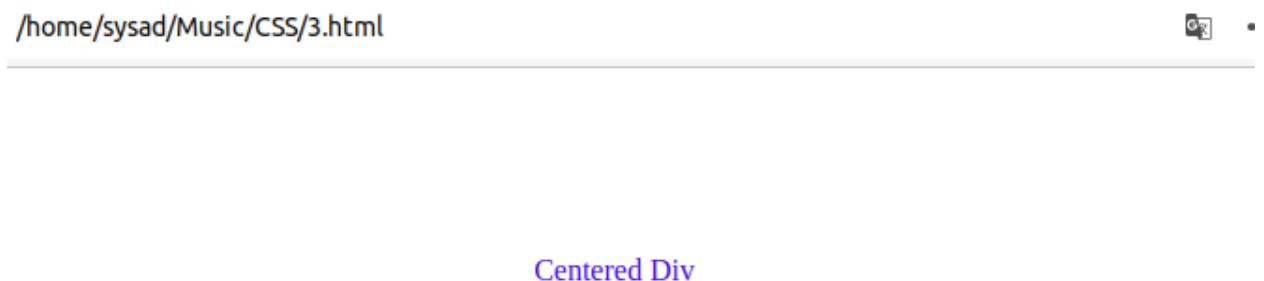

1. Create a web page which displays "Hello World" with font size 20 pixels, bold format, in "Times New Roman" font and green in color using inline CSS.

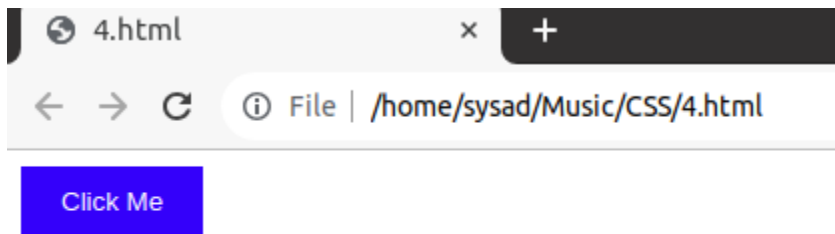

2. Using CSS Change the text color of heading to red and paragraph to blue.

3. Create a CSS rule to center a div element both horizontally and vertically within its parent container.

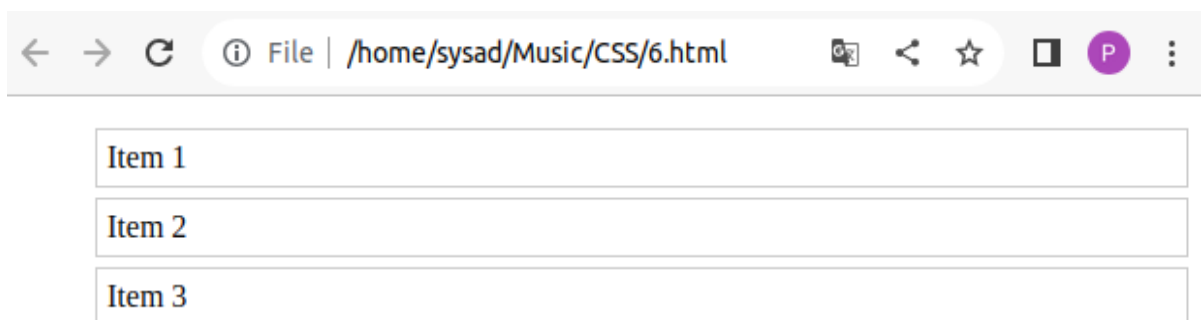

4. Create a CSS style for a button with a blue background and white text.

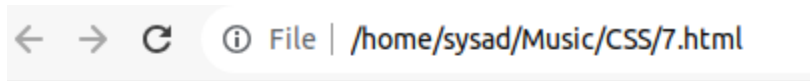

5. Using CSS add a 2px solid red border around an image to give it a distinct outline.

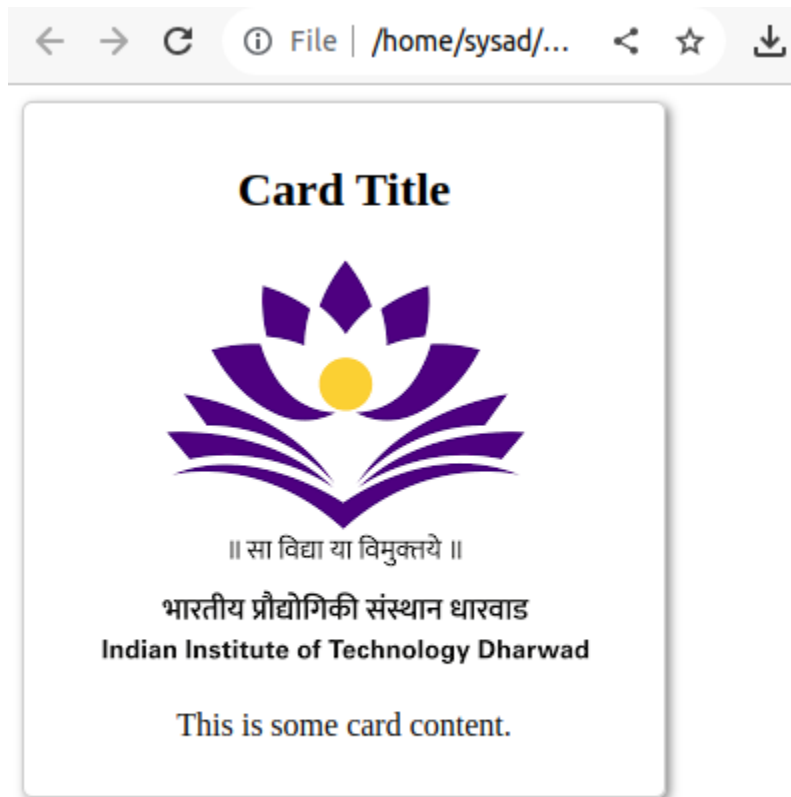

6. Using CSS Style an unordered list by removing bullet points and adding a 1px border to each list item to create a neat list format.

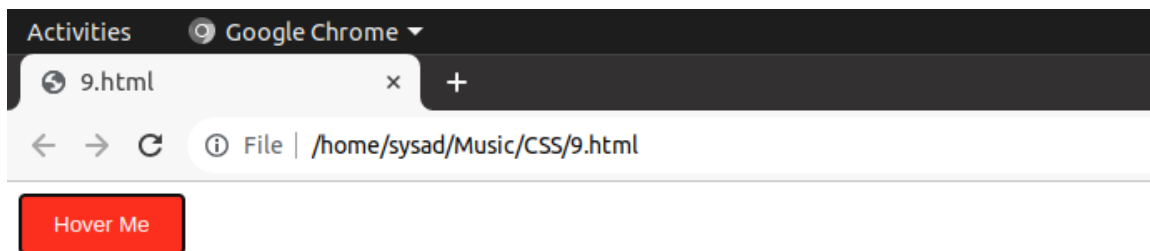

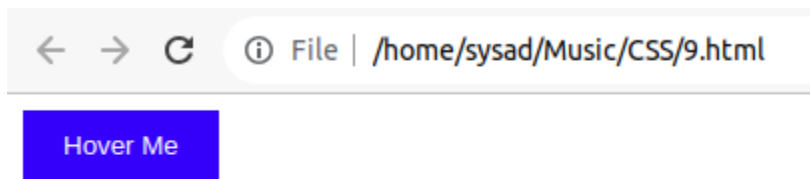

7. Using CSS Create a horizontal navigation bar with four links and ensure they are evenly spaced.

8. Using CSS Create a card-like structure with a heading, image, and some text content, adding borders and shadows to make it look like a card.

9. Using CSS Create a button that changes color to red when hovered over to provide visual feedback to users.

10. Create a web page which displays the class time table and apply the following effects on the table:
- For the table header apply blue as the background color and white for the color of the text in the table header.
 - Display day names (Mon, Tue etc...) in bold format with the first letter in the day name in uppercase.
 - Display lunch slightly in bigger font other than the remaining text.
